

WM Light Dep Exhaust Fan

Using light deprivation to control plant growth and blooming is a trending strategy for short-day plants, such as cannabis and poinsettias.

Without the proper ventilation during the light deprivation stage, heat, mold, and disease can quickly destroy your crop setting you back a whole season.

J&D's WM Light Dep Fan is a crucial piece of your greenhouse light deprivation system for healthy, robust, and profitable blooms.

- Allows for bigger, higher quality, larger profit, flowers
- Full range of sizes, even ones for small greenhouses
- Test data is for fan with light trap enabling dependable and accurate air exchange calculations
- Fan with light trap mounts flush to the interior of the building freeing up valuable space in your greenhouse and eliminating a protruding ledge that can collect debris and possible pathogens
